# Patient Data Projects

Patient Data projects are becoming more and more important, and should not be overlooked. In general, these projects carry some risks.

Per Project

	<b>Estimated total revenue</b>
Producing an interface for the 1-on-1 sharing of data between two parties	Unknown
Research into exchanging patient data by e-mail.	40,000
Aligning the database, ready for the next step.	None
Standardising data in the database, to enable sharing.	50,000
Migrating patient data to the Cloud.	-20%
Establishing one shared patient database.	850,000
Making medical information easily accessible to patients.	90,000

	<b>Estimated total revenue</b>
Client portal is accessible via patient app.	80,000
Giving patients control over data sharing.	80,000
Organising a hackathon.	Unknown
Organising virtual hackathons.	Unknown
Researching the possibilities of storing and sharing of patient data via Block Chain.	30,000
Creating a Block Chain.	110,000
Cleansing of patient data	30,000

**Trend Report:** Healthcare Projects

# Artificial Intelligence Projects

Artificial Intelligence projects are playing an increasingly important role. They carry a certain risk, but are also lucrative as they aim to prevent treatment. It is challenging to get financial backing for these costly projects.

Per Project

	<b>Estimated total revenue</b>
Analysing intestinal flora in relation to diabetes.	300,000
Personalised dietary advice based on intestinal analysis.	280,000
Computerised diagnosis of eye diseases, using Artificial Intelligence.	200,000
DNA Analysis and personalised advice for patients with diabetes.	90%
DNA Analysis and advice for most common diseases.	85%

	<b>Estimated total revenue</b>
Researching sleeping records.	200,000
Developing algorithms for Easy Care's database, analysing data patterns.	67%

# New Technology Projects

New technology can be very promising, but not risk-free. Testing and pilot projects carry less risk, but are also less rewarding.

Per Project

	<b>Estimated total revenue</b>
Researching secure ways of sending medical details by SMS.	10,000
Testing robots for changing sheets in hospital beds.	Unknown
Purchasing robots for changing sheets in hospital beds.	94%
Performing skin scans by medical assistants.	220,000
Developing an omni-sensor chip that can be implanted for measuring heart rate, blood pressure and blood sugar levels.	92%
Expanding the omni-sensor chip for measuring further physical statistics.	Unknown
Testing a surgical robot for LASIK and eye surgery.	320,000
Purchasing a surgical robot for eye treatments.	400,000

	<b>Estimated total revenue</b>
Developing a sleep tracking device.	185,000
Using video consults via a secure connection.	57%
Limited experiment: transporting medication by means of a drone, in a secured container.	140,000
Extensive testing with drones for transporting medication.	270,000
Body Scan to register all body measurements by local health centres.	300,000
Add detailed imaging to the working of the Body Scan.	370,000
Further develop the smart bedpan into a very affordable product.	42,000
Using real-time video consulting between patient, General Practitioner, and Specialist.	50%
Using a 3D Scanner and 3D printer for creating prosthetics.	350,000

**Trend Report:** Healthcare Projects

# New Business Model Projects

New business models can be very useful. Markets will be disturbed if competitors and new starters get into the market first.

Per Project

	<b>Estimated total revenue</b>
Researching a different business model.	0%
Implementing a subscription model for consumers.	40%
Implementing a business model where a computerised eye diagnosis directly refers to the regional Ophthalmologist via an App.	160,000
Paying for referrals via an integrated patient portal.	160,000

# Social Responsibility and Sustainability Projects

Clients and organisations alike appreciate the added value of sustainability and social responsibility when performing key tasks and setting goals.

Per Project

	<b>Estimated total revenue</b>
Installing solar panels on the roof.	75,000
Replacing lease cars with electrical ones.	20,000
Purchasing and selling of Fair-Trade products instead of regular products.	10%
Offering free consults to homeless people.	None
Using green energy for all databases and applications.	0%
Ecological laundry facilities in care facilities.	20,000
Donating of food surpluses.	None
Setting up a shuttle service to hospitals.	Unknown

	<b>Estimated total revenue</b>
Striving for a paperless office.	20,000
Installing RFID chips into surgical tools.	65,000
Donating used computers to a good cause.	Unknown
Re-using old batteries for storing sustainable energy.	None

**Trend Report:** Healthcare Projects

# Organisation and HR Projects

Healthcare can be vastly improved by changes in organisational and HR procedures

Per Project

	Estimated total revenue
Pilot scheme: AR/VR Training for nursing staff instead of regular training.	0%
Extensive use of AR/VR Training for nursing staff.	27%
Researching the use of flex workers.	None
Recruiting Freelancers.	60,000
Empowering further down the line of the organisation	56%
Changing the decision-making process, for example by Consent.	50%
DIY Planning.	55,000
Pilot: Trials with a patient Innovation Lab.	24,000
Structured implementation of Innovation Labs, involving patients	50,000

	Estimated total revenue
Improving processes in the chain.	65,000
Implementing continuous improvement in the chain.	100,000
Researching cooperation of Orthopaedics between a hospital and a private clinic.	20,000
Actual transfer of Orthopaedics to a private clinic.	180,000
Internally training of change agents, rather than recruiting external consultants.	Unknown
Reducing administrative pressure.	30,000
Keeping up to date on technological developments.	25,000
Creating self -organising teams.	90,000
Research into shifting second line to first line care.	Unknown
Researching the most suitable way of organising private clinics.	None
Organising large companies through Agile/Spotify models.	50%
Using the Holocracy model to re-organise.	90,000

**Trend Report:** Healthcare Projects

# Media Projects

Clients and organisations alike are influenced in many ways by modern media. It has become increasingly difficult to use social media smartly.

Per Project

	<b>Estimated total revenue</b>
Experimenting with Influencers in healthcare.	50,000
Expand Influencer Marketing in the health sector.	75,000
Launching a widespread campaign using both traditional and modern media.	120,000
